Drawings

1. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. ***Therefore, the integration of the connection admission control (CAC), bandwidth on demand (BoD), and allocation table must be shown or the feature(s) canceled from independent claims 1, 13, 20, and 23.*** No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the

Art Unit: 2666

filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Figure 1, as described in the specification on page 15 lines 15 and 16, shows the network connections between a SAU, CAC, and BoD. However, the SAU, CAC, and BoD are not labeled in the drawing. Therefore, the network connections are not apparent to the examiner.

Figure 3, as described in the specification on page 15 lines 21 and 22 and page 16 lines 5-16, shows a CAC allocation table. The applicant maintains that in the CAC allocation table each box represents a time-slot of a MF-TDMA common medium uplink. However, no boxes are apparent in the drawing.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and

Art Unit: 2666

use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. Claims 1-21 and 23-43 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

Regarding claims 1, 13, 20, and 23, the integration of the connection admission control (CAC), bandwidth on demand (BoD), and allocation table was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. As previously mentioned with regard to the drawings, connection between the CAC and BoD is not apparent to the examiner. Therefore, the integration of the CAC, BoD, and allocation table is also not apparent to the examiner. Although the specification states that an allocation table is controlled partly by the CAC when allocating static resources and partly by the BoD when allocating dynamic resources (pg. 11 lines 4-17), the

Art Unit: 2666

specification does not define the structure of these devices. It is unclear to the examiner if the CAC and BoD are physical devices or software modules.

4. Claims 1-21 and 23-43 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding claims 1, 13, 20, and 23, the applicant has not distinctly claimed the integration of the CAC, BoD, and allocation table (see reasoning above with respect to the 112 1st paragraph rejection).
